**REASON FOR ALLOWANCE**

1. Claims 1-8 are allowable over the cited prior art.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Nishio (US 4,905,279) discloses for a short range radio receiver (fig. 2) processing a received carrier in a specific band of frequencies which is modulated by a data signal, the receiver being characterized in that light receiving element 16 are arranged to receive a plurality of frequency bands so that band pass filters 14a-14c are alternately selected to pass a specific frequency band that is received (col 2, line 43 – col 3, line 16).

However, Nishio and the cited prior art fails to disclose:

the short range receiver for motor vehicle data which are connected to means for demodulating the transposed carrier, which are arranged to supply the demodulated data, and that frequency discrimination means are provided, connected to the antenna means arranged to determine respective reception levels within the bands in order to compare them with each other and to control the frequency transposing means depending on the result of the comparison.

Also, the cited prior art fails to teach or suggest for the reason as set forth in applicant's remarks, see page 5, line 1 – page 7, line 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
